

As Girişim Elektrik A.Ş. and its employees, we comply with national and international laws, regulations, and standards, and operate within an energy management system based on continuous improvement by providing the necessary resources. In the regions where we operate;

- ❖ To establish and maintain a system compliant with the ISO 50001 Energy Management System standard,
- ❖ To use energy, raw materials, and natural resources efficiently in our products and all processes,
- ❖ To prefer and procure energy-efficient products, technologies, applications, and services in design, procurement, production, and all other processes,
- ❖ To consider energy performance improvements in the design and revision of products and production processes,
- ❖ To raise awareness among our employees, stakeholders, society, and the entire value chain about resource and energy efficiency,
- ❖ To monitor competitive alternative new technologies and digital applications and integrate them into processes,
- ❖ To ensure continuous improvement when setting objectives and targets for energy performance and management,
- ❖ To evaluate risks and opportunities from an energy perspective and develop proactive solutions,
- ❖ To encourage our suppliers and subcontractors to approach energy and environmental processes with similar awareness,
- ❖ We manage our activities within the framework of Environmental, Occupational Health and Safety, Quality Management Systems, and Global Business Ethics principles in an integrated and sustainable approach, and we work with all our strength to be a leading organization in our sector.
